December Safety Notice: Severe Weather Preparedness Plan

The University has recently updated its Hurricane Procedures and incorporated them into a **Severe Weather Preparedness Plan**, which now addresses University preparation and response procedures for all instances of severe weather. Please take a few moments to review the plan with your department to make sure everyone is familiar with the content of the plan and any departmental responsibilities.

Also, please make sure your RWU Alert emergency contact information is up-to-date. RWU Alert is the University’s emergency notification service that will broadcast e-mail, text, and phone call notices with vital information in the case of an emergency situation on campus or for severe weather-related advisories. Directions for updating your information, and a link to the RWU Alert website, can be found on the EHS website (**click here to view**).
