

UNDECLARED

Roger Williams University offers a wide variety of programs across the arts, sciences, and professional fields - all with a strong liberal arts foundation. Students explore their interests and passions through general education courses, majors and minors, and electives. With over 50 majors as well as minors, concentrations, and certificates to choose, your choices and opportunities are endless!

Students still exploring their options for a major have plenty of time during their first three semesters to gather information, build relationships, and try new academic interests. All exploring students work with an assigned faculty academic advisor as well as members

of the Center for Student Academic Success team, including professional advisors and peer mentors. Students are also supported by career advisors in the Center for Career and Professional Development who help exploring students assess their strengths and interests and discover career pathways.

All RWU students take courses in the Core general education program. This innovative educational path has a variety of course offerings. Students exploring their major can be assured that their Core coursework will guide them beyond the boundaries of any particular discipline and assist with identifying academic areas of interest.

THE CURRICULUM AT RWU

Designed with flexibility in mind, it's easy to think about your RWU degree in thirds. Of the 120 credits required for graduation, approximately one-third will be in your primary major, one-third will be in the Core Curriculum, and one-third will be comprised of courses you and your advisor choose to meet your academic needs and interests.

So, what does this flexibility mean for you? You'll have:

- Plenty of room to explore your interests and discover new ones.
- The ability to easily add a second major or minor(s) – in fact, over 80% of RWU students graduate with more than just a single major.
- Space in your coursework to hone specific skills and interests, intern in your field, or study abroad.

PROGRAMS TO CHOOSE FROM
