

ECONOMICS

Economics is the study of how individuals, businesses and governments make the best possible choices, respond to incentives and act on decisions working with limited and finite resources. Through internships, projects in the community, and professional research, Economics majors at RWU analyze complex, interconnected systems and use their knowledge to make predictions about the impact of decisions on global economies and individual organizations.

STUDENT EXPERIENCE

Learn and Do More at RWU

With a focus on experiential learning at RWU, Economics majors can:

- Partner with organizations and businesses to solve problems that matter to them. Examples include: working with farming cooperative Indie Growers to analyze its crop production and with HousingWorks RI to evaluate the need for public housing.
- Sharpen their analytical skills in the annual Fed Challenge in Boston, where students examine real time economic data from multiple sources, prepare and chart their analyses, and present policy recommendations to a group from the Board of Governors of the Federal Reserve Bank.
- Collaborate on research with faculty members who are experts in their field. Students have co-authored papers with faculty on topics such as: the role of women in the economic development of Turkey, whether policies should focus on happiness or economic growth and the relationship of poverty to economic growth.

- + Do you ever wonder about the multiple economic considerations of running a major healthcare, business, government, educational or other organization?
- + Are you curious about how governments around the world apply economic information and metrics to decision making on policies and actions?

CAREER OUTLOOK

RWU **Economics** alumni are working in a variety of fields:

- Government agencies
- Nonprofit organizations
- Banking & Insurance
- Financial investment
- Consulting firms
- Higher Education

ALUMNI SPOTLIGHT

The Economics program developed my analytical skills by teaching me to consider all factors that can influence a variable. As an Underwriting Consultant at Aetna, I was able to apply these skills to analyze catastrophic medical risk and develop premium rates for large corporations.

CURRICULUM

Two Degree Options

Students at RWU may select either a Bachelor of Science or or Bachelor of Arts degree in Economics.

- Both programs teach the key methodology and analytical techniques in Economics, from microeconomics/macroeconomics to econometrics.
- In the business-focused track, B.S. students take the Business Core curriculum, which provides a strong foundation in all aspects of business, from the principles and theories of enterprise to accounting, Finance, management, operations, and marketing.
- Alternatively, with a less-intensive business focus, the B.A. degree offers students flexibility to pursue liberal arts electives, minors or a second major in another area outside of business.
- With both programs, you'll get to take a number of electives, including:
 - International Economics
 - International Trade
 - Econometrics
 - The Economics of Developing Countries

Internship Opportunities

RWU Economics majors have interned or accepted full-time positions at many different type of organizations, or gone on immediately for graduate degrees at outstanding institutions.

- Alex & Ani
- Covidien
- Duke University
- GLC Advisors & Co., Inc.
- IDEXX Laboratories, Inc.
- U.S. Small Business Administration

Earn your BA/BS and MBA in 5 years

Interested in getting an MBA? The accredited 4+1 Master of Business Administration program allows you to earn both the B.S. and MBA degrees in just 5 years. Some features of the program include strategic thinking, problem solving, data analytics and leadership skills to thrive in a competitive business environment. A required internship and international study component provide practical, real-world experience that prepares you for a successful career anywhere in the global economy.
