

Class of 2011 Alumni 9-Month Survey

Methodology

A complete survey was distributed 9-months after the graduating class of 2011 completed their undergraduate education at Roger Williams University. An email link to the survey was sent out to graduating seniors.

Data Analysis

The Career Center, in partnership with the Institutional Research, analyzed the survey data by examining the responses for the employment status, name of employers, job titles, salaries, educational institutions attending, degrees being sought, degree program enrolled, and involvement in RWU programs. The survey yielded information on 384 new graduates providing a response rate over 52%. RWU was able to maintain its historic above 80% employment rate (88%).
