

BCBSRI Pharmacy Program April 1, 2021 Formulary Changes

Large Group, Small Groups Formulary Update

The following brand name and generic drugs with preferred alternatives will be **excluded** from coverage effective April 1, 2021. Coverage requests for an excluded drug will require written documentation that they are medically necessary. The table below lists alternatives which your doctor may be able to prescribe, so we encourage you to call or make an appointment as soon as possible. As always, switching to an alternative medication is a decision between you and your doctor.
