

Marine & Natural Sciences Seminar Series

Wednesdays, 3:00 – 4:00 PM, Zoom or MNS 200

9/7 Meet Your Advisor!

9/14 **Celebration of Undergraduate Research**
Learn about How to get involved with research

9/21 **Nelle Couret**, University of Rhode Island
Speaks on TBD

9/28 **Eric Bubar**, Marymount
Speaks on How ANYONE can be an arms dealer
ZOOM

10/5 **Phillip Tai**, University of Massachusetts Medical School
Speaks on The ins and outs of adeno-associated virus and human gene therapy

10/12 **Carol Thornber**, University of Rhode Island
Speaks on Understanding blooms of macroalgae (seaweeds) in Narragansett Bay

10/19 **Gagliardi Family Seminar: Roger Everett Summons**, Massachusetts Institute of Technology
Speaks on Insights into Earth's oxygenation from the geological record of chemical fossils

10/26 **Rob Holmberg**, Down East Institute
Speaks on Behavioral and physiological effects of climate change scenarios on larvae of a continental shelf bivalve: dispersal and energy budget implications

11/2 **Tyler Stack**, Providence College
Speaks on Characterizing Drug-Modifying Reductases derived from Human Gut Bacteria

11/9 **Marc Tatar**, Brown University
Speaks on TBD

11/16 **Joel Singley**, Roger Williams University
Speaks on What Underlies Forest Drought Resilience from Days to Decades in the Southern Sierra Nevada?

11/30 **Hum Bhandari**, Roger Williams University
Speaks on Applications of Artificial Intelligence, Machine Learning, and Big Data for Solving Complex Problems in Science, Engineering, and Business

12/7 **Kristen Scaplen**, Bryant University
Speaks on Neural Circuitry Mechanisms Underlying Alcohol Addiction: Contributions from Drosophila

Some speakers this semester will be joining us via Zoom.
Join the Zoom call using the URL
