

Battery Recycling

Definition: Batteries are classified as Universal Waste by the RI department of Environmental Management. Different kinds of batteries contain different chemicals, including potassium hydroxide, sulfuric acid, lead, nickel, cadmium, and silver. DO NOT THROW AWAY.

Common Battery Types: **Alkaline** (AA, AAA, C, D, 9 Volt, etc.), **Lithium**, **Nickel-Cadmium**, **Lead-acid**, **Silver-oxide**, and, **Nickel-metal hydride**.

Disposal: All batteries must be collected in special receptacles located around campus. If the battery is too large to fit into the container or your area is in need of a collection container, please call or email CHSO Cat Conley (x3781) to arrange disposal.

Building	Location
